ADOT received 8,751 individual comments on the Draft Tier 1 EIS that originated from national email campaigns. National email campaign comments were associated with the National Parks Conservation Association, Sierra Club, Every Action Custom, and Know Who. The comments consisted of four form letters. Each comment is inventoried and responded to in the tables that follow. The form letters are included before the table.

Several individuals customized language to personalize the form letters, but this customization did not change the overall content of the comment. The unique submissions are presented after the form letters.

Standard responses were prepared to provide broad responses to the most frequently raised issues and to supplement unique comment responses. Standard response codes referenced in comment responses correspond to the codes underlined in bold in Appendix H1 (Standard Responses).

The tracking code reported in the table is a unique identifier assigned to each comment as it was received. The purpose of the tracking code is to provide a unique identifier so that each comment can be traced back to its original submission, if needed.

Some comments were submitted multiple times by the same or different commenters. All comments are reported as submitted; any duplicates are the result of the same comment being submitted multiple times.

Personal contact information has been redacted (replaced with XXX) as a courtesy.
