

What is a Tier 1 versus a Tier 2?

Tier 1 EIS

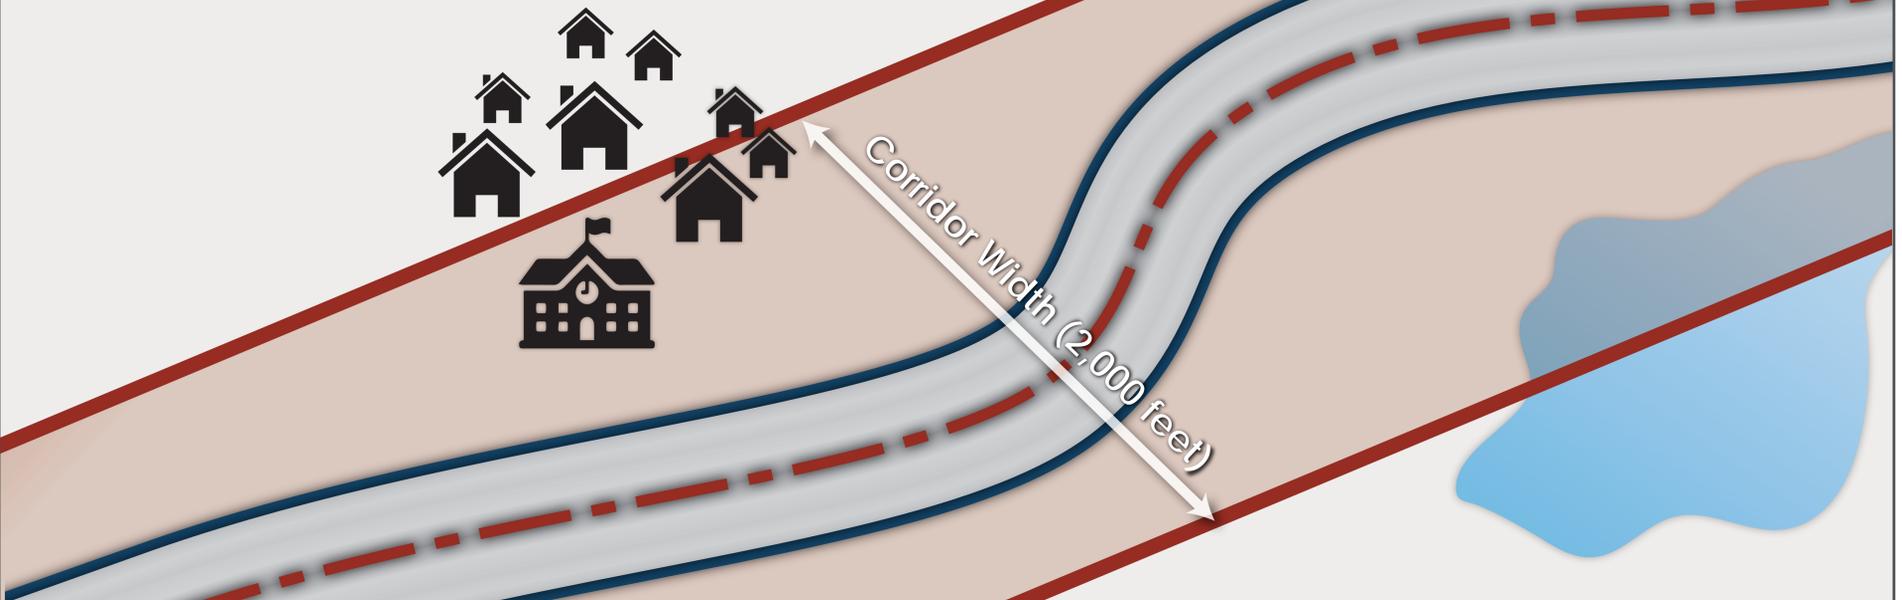

Evaluates wide corridors in multiple locations, at a program level, within which a new transportation facility could be located.

Outcome: Select a single corridor within which an alignment would be identified during Tier 2.

Tier 2 Environmental Study

Alignment and width are refined to minimize impacts

Evaluates design concepts for specific alignments within the corridor, such as 400 feet for a typical freeway alignment.

Outcome: Select an alignment and enable permitting for that alignment.
